

## **Analytics Lead – Financial Services**

Mumbai Area, India

### **Job Description**

Fractal Analytics is a high-growth analytic consulting firm seeking an analytics lead with at least three years experience in predictive or business analytics. The incumbent will manage and engage client teams to understand, define and develop data-driven solutions to meet the needs of clients in financial services.

### **Responsibilities**

- Manage delivery project teams with limited direction, usually within a complex environment, to drive rigorous, fact-based solutions and insights for clients
- Develop sophisticated analytical frameworks that add value to the client and result in new projects and revenue streams for Fractal
- Develop and implement analytical methodologies, processes, and technological solutions that integrate diverse information solutions and generate analytical insights
- Leverage technology to enhance the competitive position of clients by identifying appropriate solutions and/or products and designs
- Effectively provide consultancy to clients on various aspects of their business using data analytics
- Build a team of skilled and motivated analysts/senior analysts to deliver large data-based projects to the financial services clients; outline goals, conduct the performance review and appraisal of the team and coach employees

### **Desired Skills & Experience**

- At least 3 years experience in delivery, account management and business development in a data analytics environment
- At least 3 years experience in the financial services industry, preferable cards
- Payments industry experience and multi-national business experience preferred
- Excellent verbal and written communication skills
- Superior analytical, problem solving and organizational skills
- Hands-on experience on data mining tools like SAS, Cognos, Microstrategy, etc
- Proven ability to rapidly learn, evaluate, and integrate new and existing technologies to realize business value
- Strong business acumen and ability to translate data insights into meaningful business recommendations
- Excellent skills in Microsoft PowerPoint, Excel and other spreadsheets
- Strong interpersonal and networking skills and ability to communicate effectively with senior management teams of large multinational clients in FS

**Education:** BE in Statistics/Economics or MS/MBA
