

Senior Analyst – Financial Services

Mumbai Area, India

Job Description

Fractal Analytics is a high-growth analytic consulting firm seeking an analyst with at least two years experience in financial services and analytics. The incumbent will examine and analyze data, produce documentation, reports, graphs, statistical models, and summaries of findings that address specific client needs.

Responsibilities

- Develop sophisticated analytical frameworks that add value to addressing client needs
- Use statistical tools to identify and evaluate the relationships between data fields, analyze output and determine the next action
- Perform quality checks during all stages of job delivery
- Timely completion of all deliverables allowing sufficient time for quality checks, analytic and business context reviews and associated revisions
- Attend training programs facilitated by Fractal for personal and professional development

Desired Skills & Experience

- 2 or more years of experience in the field of analytics
- Good understanding of the financial services industry, special focus on credit cards a plus
- Ability to understand and transform data to meet the customer's needs and business context
- Client focus to exceed client expectations
- Superior analytical and problem solving
- Good knowledge of statistics / econometrics
- Attention to detail and passion for accuracy
- Proficiency with SAS/SPSS preferred
- Proficient with Microsoft Word, Excel and PowerPoint
- Good verbal and written communication skills
- Good interpersonal skills and a team player
- Open and flexible to travel across various client locations and Fractal offices.

Education: BE/ B.Tech (any discipline) or MS in Statistics/Economics.
